

Solid Color Flooring Systems

System Description

100% solids, pigmented epoxy flooring system with low surface tension designed for coating commercial and industrial floors. The base coat is an amine-cured, self-leveling, epoxy floor coating that exhibits excellent resistance to organic solvents, caustic environments, and dilute acidic exposures, while also displaying outstanding mechanical properties, such as adhesion and abrasion resistance. The base coat is available as both full ceramic & semi-ceramic, and is offered in an assortment of standard colors.

Application Summary

Components are 2K products that are mixed on site and typically applied with a notched trowel, squeegee, roller or airless spray to create a smooth, glossy floor.

Common Applications

Warehouse, hangars, maintenance shop, packaging area, process rooms, machine shop, loading docks, test areas, manufacturing areas, light industrial, walkways, pharmaceutical processing areas, USDA inspected facilities, chemical processing areas.
