

DESCRIPTION:

TrowelEase 1162-PK is a four component patching kit used to repair concrete. Specifically, it is used for epoxy overlays, repairing spalled concrete (holes), and resurfacing old or damaged concrete.

TrowelEase 1162-PK uses a special blend of engineered silica aggregate and a two component epoxy binder that provides a high-strength, easy to work with mortar.

PACKAGING:

Each kit includes:

- 5-Gallon mixing pail
- Part A Binder Resin
- Part B Binder Hardener
- Part C Engineered Aggregate
- Part D (optional) Color Pack

RECOMMENDED USES:

TrowelEase 1162-PK is an epoxy-based mortar used to patch or overlay horizontal surfaces. Other uses include rebuilding joint nosings on warehouse floors, buildings, parking decks, pot holes, spalls, gaps, ect.

Available Colors:

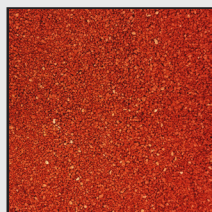

Natural Sand
(TN9A)

Slate Gray
(GY6A)

Iron Black
(BK8A)

Adobe Red
(RD3B)

Stronger than concrete
Easy application
Great for forklift traffic

ADVANTAGES:

- No V.O.C's - Solvent Free
- No Offensive Odor
- Complete Kit
- Excellent Bond Strength
- High Strength Mortar
- Quick Setting
- Very Durable Wear Surface
- USDA Compliant
- 3-5 Times Stronger than Concrete
