

Most Specified Polymer Flooring Systems

Wolverine Coatings Corporation is a formulator and manufacturer of technologically advanced Tank Linings, Pipe Linings, Secondary Containment Linings, Polymer Flooring, Adhesives, Specialty Coatings, Resins for Composites, and Dispersions.

System Category - Solid Color

LiquaTile - LiquaTile products are 100% solids, pigmented coatings with low surface tension designed for commercial, industrial, and institutional use. These systems consist of a primer and a topcoat that gives durable protection for concrete. LiquaTile products are available in many different formulations to fit your specific application, and are offered in an assortment of standard colors – special order colors are also available.

Common Applications - Clean rooms, warehouse flooring, hangars, packaging areas, USDA/FDA inspected facilities, machine shops, pharmaceutical & medical processing.

System Category - Line Striping

LineGevity - LineGevity products are 100% solids, pigmented, self-leveling materials designed for striping commercial, institutional, and industrial floors. LineGevity products come in many different formulations displaying outstanding mechanical properties, such as impact resistance, abrasion resistance, and adhesion. When incorporating LineGevity striping systems into a LiquaTile flooring system, a customer can expect years of hassle-free, dynamic looking floors in even the most unforgiving environments. Fork lifts and skids have finally met their match.

Common Applications - Walkways, forklift parking, USDA/FDA inspected facilities, warehouse organization, shipping & receiving areas.

“Essentially, we are a solutions company, bringing unique resin technologies to resolve worries in industrial environments.”

SYSTEMS

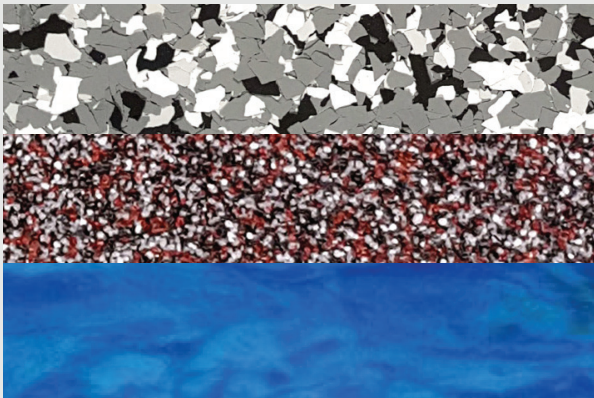

System Category - Resistant

ChemShield - ChemShield products are designed to resist particular chemicals or classes of chemicals. These products can be formulated to offer fast turn-around times, high abrasion resistance, excellent adhesion, and extreme durability. Our chemists have experience solving some of the most difficult and harshest corrosion and chemical problems that have faced our world. We bring that level of technology and knowledge to bear in creating a solution for your project.

Common Applications - Pharmaceutical & medical facilities, USDA/FDA inspected facilities, garb rooms, mixing rooms, dry rooms, food processing.

System Category - Decorative

DecoFlakes, ColorQuartz, & MetallicFX - These decorative flooring systems may include flakes, colored quartz granules, or specialty metallics. They excel in high traffic, commercial, industrial, and institutional contexts – bringing together beauty and brawn. Varying formulations offer differing degrees of chemical resistance, slip resistance, textures, and appearances.

Common Applications - Kitchens, pharmaceutical & medical facilities, bathrooms, foyers, hallways, store fronts, offices, USDA/FDA inspected facilities

System Category - Super Duty

TrowelEase & TitanTrowel - TrowelEase and TitanTrowel products are polymer mortars that repair, rejuvenate, resurface, and restore concrete floors. Since all of these products are significantly stronger than concrete, these ¼” systems can be applied to an existing floor - adding life and durability. The TrowelEase and TitanTrowel products can be top-coated with many of the LiquaTile or ChemShield products - offering an impervious flooring system for your facility.

Common Applications - Manufacturing facilities, hangars, renovation of old facilities, USDA/FDA inspected facilities, CNC facilities, fabrication facilities, sloping floors.
