

**DESCRIPTION:**

Our 100% solids, thick film Advanced Hybrid lining system is designed for general use as a protective lining for swimming pools, aquatic environments, domestic waste water facilities, and other mildly aggressive immersion chemical environments. These linings also display outstanding mechanical properties, such as adhesion and abrasion resistance, and were designed to be a high density (low porosity) lining system. It is a natural choice for aquatic environments as well as USDA & FDA Inspected facilities, clean rooms and other areas where a smooth easy to clean surface is desired.

**RECOMMENDED USES:**

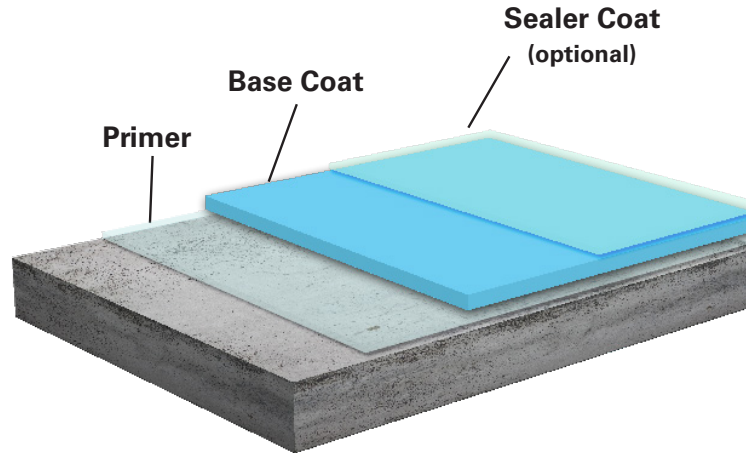

Pools, fountains, aquatic animal exhibits, water parks, water sports centers, aquatic training facilities

**PACKAGING:**

Available in 3 gallon kits and 3 quart kits.

Each kit includes:

- Part A Binder Resin • Part B Binder Hardener

**Available Colors:**
