

# ColorQuartz

**ColorQuartz** are a decorative resinous system that uses a double broadcast of crystalline silica media, typically top coated with EnduraShield 2254 (urethane). The double broadcast gives an overall denser and fuller look to the quartz. The ColorQuartz used in this system are available in many colors as well as standard and custom blends for unique coating solutions.

ColorQuartz are broadcast by hand or by pneumatic blow gun/hopper as indicated in the Technical Data Sheet for this system.

## COMPONENTS

**Media:** ColorQuartz 121

**Primer:** BondTite 1101

**Base Coat:** DecoFX 1110

**Flood Coat:** DecoFX 1110

**Sealer Coat:** EnduraShield 2254
